VMR TO MAP GRAND CANYON SOUTH VILLAGE

Scottsdale, Arizona, October, 2006 – Scottsdale-based Vertical Mapping Resources, Inc. has been hired by a local company to map a large portion of the beautiful Grand Canyon South Village. For this project, VMR will be providing black-and-white aerial photography, digital terrain models including 1' contours, design scale planimetrics and digital orthophotography of the popular tourist destination.

Vertical Mapping Resources, Inc. is a full-service geospatial information firm providing traditional and digital photogrammetric mapping, as well as state-of-the-art geotechnologies, imaging and land information consulting services. We specialize in A/E design scale topographic and planimetric mapping, surface modeling, digital orthophotography, city and county GIS basemapping and updating services. VMR integrates cutting-edge hardware and software systems through each phase of the photogrammetric process to achieve an efficient, seamless production workflow.
